Kayci Stone

Software Developer

St Petersburg, FL | (941) 685 5918

kaycistone.com | github.com/kaysto | linkedin.com/in/kaycistone | kaycistone15@gmail.com

Software Developer specializing in Front End design with the ability to pick up new languages and technologies as needed. Looking to combine and apply skills learned in previous work environments with my current engineering skills.

Software Development Skills

- JavaScript, React, Node.js, Express, PostgreSQL, Sequelize, Bootstrap, Flexbox AWS, HTML, CSS, Debugging

Education

State College of Florida | Associates in Arts | Bradenton, FL   January 2015 – May 2017

DigitalCrafts | Certificate in Software Engineering | Atlanta, GA   October 2020 – May 2021

- Software engineering training program covering full-stack development including, but not limited to JavaScript, with an emphasis on cutting-edge frameworks like React/Redux and server-side technologies including Node.js, Express, and PostgreSQL.

Software Development Portfolio

Forte | kaysto.github.io/ReactProject | github.com/kaysto/ReactProject   April 2021

- Solo project created to apply React skills; site was designed to operate as a piano simulator
- Primary goals were to create an interactive site that would allow users to operate the piano keys with their computer keyboard- focus was on the functionality and then on the front-end design once functionality was working
- Developed more React skills while also improving CSS design

Knitlify | dreamy-leakey-cf0b9f.netlify.app | https://github.com/kaysto/Knitlify   March 2021

- Solo project that was created to allow users to visit a site that provided information on knitting, embroidery, and crocheting for beginners and all other skill levels
- Focus of this project was to apply skills learned at the beginning of my time at DigitalCrafts to a site created completely on my own
- Built with HTML and CSS; components added that could be easily modified in the future with JavaScript for a more interactive experience

Kankoku | elastic-lalande-b28d71.netlify.app | github.com/kaysto/FrontEndProject   January 2021

- Member of a 2-person development team building a site designed to assist users in choosing an Anime TV series to watch based off of provided ratings, reviews, and synopses
- Responsibilities included creating HTML and CSS code to be integrated with API used to display series' information, as well as front-running the design and layout of the site
- Project was built with HTML, CSS, and JavaScript

Professional Work Experience

Goldfein Claims Mgmt, LLC | Claims Assistant | St Petersburg, FL   Mar 2021 – Present

- Daily work consists of maintaining multiple queues of documents that need to be reviewed and processed as well as being flexible and floating to different departments' work lists to assist

- Responsible for helping to train any new hires that join our team through shadowing and one-on-one in-depth practice
- Goals are set each day and are met through time management, prioritizing, and problem-solving skills

Community Health Systems | Accounts Receivable Rep | Sarasota, FL   Jul 2018 – Feb 2021

- Reviewed processed medical insurance claims to ensure accuracy of payment
- Maintained constant contact with insurance companies to work through incorrectly processed claims and resolve issues
- Managed multiple spreadsheets with accounts to work each day, ensuring they were all up-to-date
- Worked with co-workers and management to create and implement more efficient workflow processes
